Art Unit: 3764

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 7-38, drawn to a computer system for locking out exercises from an exercise device, classified in class 235, subclass 382.
- II. Claims 39-48, 55-58 drawn to a system for scheduling the use of an exercise device, classified in class 482, subclass 1.
- III. Claims 49 and 50, drawn to a system for indicating availability of an exercise machine, classified in class 434, subclass 247.
- IV. Claims 51-54, drawn to a system from monitoring the status of an exercise machine, classified in class 463, subclass 25.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-IV have separate utility such as a scheduler and a locking out system. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Michael Shea on 11/16/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
